

# HRP 200

Tough economic times bring opportunities for innovation and new thinking. Your customers are looking for ways to save money and the B-hyve catch cups with the Irrigation Audit App positions the irrigation professional perfectly to provide customers with water saving solutions. HRA 100 App with companion catch cups provide accurate readouts of both residential and commercial irrigation systems, allowing you to make suggestions for upgrades and changes.

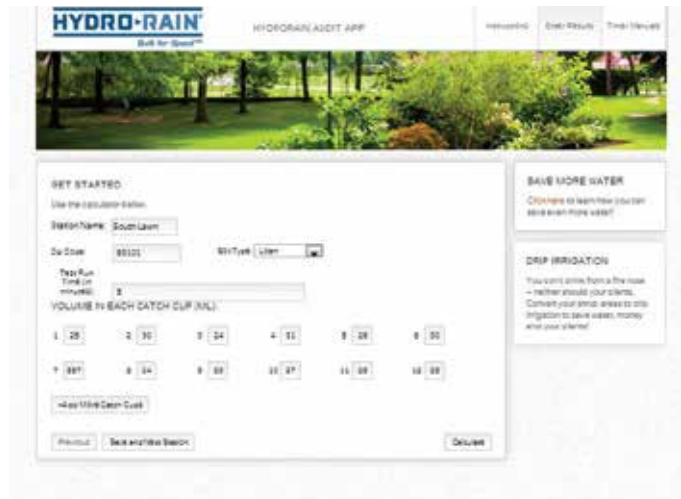

First, durable, UV-resistant plastic catch cups with easy-to-read markings bring speed and accuracy to the job site—Perfect for testing individual irrigation zones for uniformity.

Next, the HRA 100 Irrigation Audit App lets you quickly record the data while on the job. The App gives fast, free and accurate results of the irrigation audit, allowing you to program the customer’s controller on the spot for maximum water efficiency.

With readouts this accurate you’ll be able to advertise not just the greenest lawns, but the lowest water bills.

### FEATURES AND BENEFITS

- **Fast Deployment and Takedown**—Installed and gathered quickly so you can get on to the next job.
- **Easy Readouts**—Clear, injection-molded plastic catch cups give easy readouts of each cup.
- **Durable plastic**—UV protected plastic cups and stakes make for long-lasting catch cups that will withstand the pressures of professional use.
- **Expandability**—Catch cups come in packs of twelve but can easily be expanded to provide more accuracy.
- **Companion App**—Hydro-Rain®’s Irrigation Audit App gives readouts on the go. Works with all major mobile devices and tablets.

## APP DETAILS

- Accurately calculates distribution uniformity based on readouts of catch cups.
- Can be tailored for large commercial projects, small residential jobs and everything in between.
- Provides ideal scheduling suggestions for controller, indicating number of start times, delay between start times and run time. Also gives indications of how frequently watering should occur based on month.
- Allows for printing and emailing of results for customer convenience and for your records. Printed version provides detailed instructions along with quick reference.
- Readouts based on number of stations, soil type, zip code (ET data), run time, and catch cup findings.
- App provides quick link to all Hydro-Rain® controllers for reference when programming.
